Sub-audible Tone Automation Information

Sub-audible cue tones, for use with automation control, are provided on Learfield's Internet Streaming Networks. If your station prefers to use the cue tones for automation purposes a "Tone Decoder" is required. Many brands of decoders are available from any broadcast equipment supplier.

Please refer to the table for proper cues for your network(s).

Sports Networks via "CCBD"	25 Hz – Local Break Start 35 Hz – Legal ID 25/35 Hz – End of Broadcast

For a test of the sub-audible signaling or if you have any questions or need technical assistance you may call the Learfield Engineering department at 573-893-1955.
